DESCRIPTION

Maruyama direct drive pump MS905 offers a compact design and features Maruyama's patented UNIFLOW technology that ensures that the fluid moves in only one direction through the pump reducing pulsation and maintaining constant pressure for an efficient chemical application. Maruyama piston pumps require a lot less energy to operate and are easy to maintain. Ideal for use in lawn care, agriculture, golf, pest control, sanitation, parks & recreation, tree care industries and even fire suppression.

Every pump is manufactured to the highest standards and tested prior to delivery for unmatched quality control.

Building quality spray equipment since 1895!

MAIN FEATURES
