DESCRIPTION

Maruyama Pump / Engine Combos are versatile as a power Sprayer or as simple as a repower unit.

Every Maruyama piston pump features the unique UNIFLOW system. By preserving the only one direction inertia of the fluid, Maruyama piston pumps achieve higher performance, increase durability and superior efficiency. Maruyama piston pumps don't require mineral grease to lubricate. The pumped fluid self-lubricates and cools the piston cylinder minimizing wearing and keeping your application free from contaminants.

The Maruyama pump / engine units are designed simply better to guarantee that your sprayer will offer long durability, less downtime and less maintenance.

Assembled from components matched for compatibility and superior quality, Maruyama pump/engine spray combos are unrivaled for performance and extraordinary durability. The finest Maruyama high-volume piston pumps and Honda commercial engines are paired to complete combinations that are simply better.

Building quality spray equipment since 1895!

MAIN FEATURES

- IRON-5YR commercial warranty
- Maruyama Uniflow, superior durability duplex and triplex piston pumps
- Dependable Honda commercial-grade engines
- Strong frame to protect unit and make transportation easy
- Made in Japan

4-Cycle Engine	Honda GX160 Gas Engine 5.5 Hp
Pump Type	MSD41 Uniflow triplex piston pump
Cylinder Coating	Chrome
Drive	Direct drive pump
Dry Weight	71.6 lbs.
Max Pressure	580 psi
Flow/Suction Volume	8 gpm
Agitation	Liquid bypass
CARB & EPA Compliant	Yes
Commercial Warranty	5 years
Item No.	366545
MSRP	$1,1364
